

AI Data Studio

Real-Time Data Intelligence for Modern Enterprises

Replace scattered reporting with a unified, real-time intelligence hub. AI Data Studio gives leaders consistent KPIs, live dashboards, and governed analytics at scale.

BACKGROUND

Modern enterprises run on dozens of transactional systems, cloud apps, spreadsheets, and third-party platforms. But without a unified intelligence layer, critical decisions are slowed down by inconsistent KPIs, manual reporting cycles, and disconnected data sources.

AI Data Studio was built to give organizations a single governed analytics foundation that blends operational systems, streaming feeds, and external APIs into real-time dashboards, AI-powered insights, and secure self-service exploration.

CHALLENGE

Enterprise teams are facing:

- Fragmented data spread across apps, clouds, and departmental spreadsheets
- Slow, manual reporting cycles that delay time-sensitive decisions
- Lack of a single source of truth for KPI alignment and executive reporting

Without an integrated intelligence layer, analytics teams cannot scale, and business units cannot operate with confidence.

SOLUTION

AI Data Studio unifies enterprise data into a governed, real-time intelligence hub. It provides pipelines, dashboards, AI-assisted analysis, and role-based access so leaders and frontline teams can make faster, more accurate decisions without creating another data swamp.

With AI Data Studio, you get:

- A governed single source of truth across all operational systems
- Real-time dashboards for executives and operational teams
- AI-assisted analysis including anomaly detection, forecasting, and text-to-insights

Key Capabilities:

- **Unified Data Hub:** Connects all core systems + custom apps/APIs
- **Flexible Pipelines:** Real-time CDC, streaming, and batch loads
- **AI Insights:** Forecasting, risk scoring, and recommendations
- **Self-Service BI:** Dashboards + ad-hoc analysis for all roles
- **Governance & Security:** Catalogs, lineage, access control, audits
- **Multi-Cloud/Hybrid:** Cloud or on-prem deployment

RESULTS

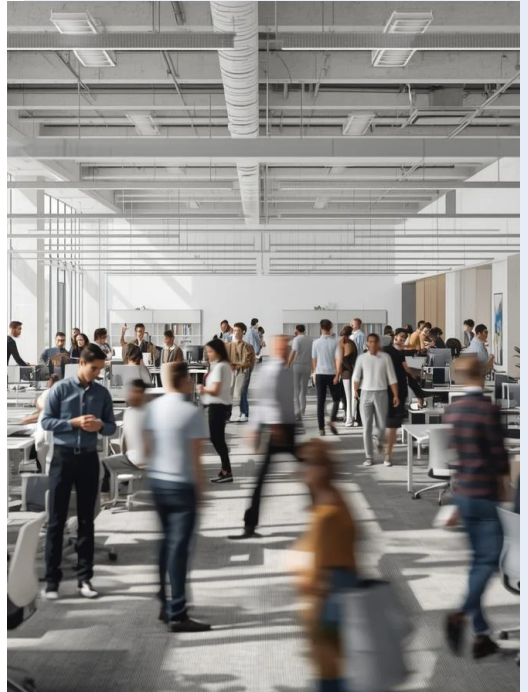

Organizations using AI Data Studio report:

- 50–70% less manual reporting effort
- Faster, data-driven decisions at all levels
- Greater trust via governed, consistent metrics

Sample Use Cases:

- Revenue and pipeline analytics for sales leadership
- Operations command center tracking SLAs, incidents, and capacity
- Workforce analytics covering turnover, staffing, and skills planning

WHY ANUBAVAM

- 20+ years designing enterprise data and analytics platforms across industries
- Deep expertise in AI engines, integrations, and domain-specific data models
- Proven frameworks for scaling from pilot projects to enterprise-wide intelligence rollouts
